Faith Fire & Focus

GLOBAL GRAPH

A) **FAITH** (Low Risk); Faith is about belief. It is the belief that the best can and will happen combined with the ability to stay on track regardless of the circumstances. Whether we believe we're intelligent or stupid, lovable or unlovable, in charge of our lives or victims without choice, those beliefs drive what we do. The absence of Faith is fear and self-doubt.

B) **FIRE** (Low Risk); Fire is about energy and compassion. It is the drive and energy for completing tasks and goals. The absence of Fire could be described as indifference, low motivation, lack of commitment and lack of interest.

C) **FOCUS** (Low Risk); Focus is about directed attention or concentration. It's what leads to the quiet mind and sense of effortlessness we feel when we do things well. It is the ability to identify and take care of critical issues, tasks, and goals. The absence of Focus could be described as inconsistency. It leads to distracted, interrupted effort and irregularity in performance.
