Innovation Leadership

APPLICATIONS

This report addresses the particular skills important for the three dimensions of Innovation Leadership. An understanding of one's skill in these areas is beneficial in many ways:

TRAINING : A tool for assessing training needs and designing development programs for those in or aspiring to leadership positions requiring new directions and future thinking.

SELF DEVELOPMENT : A mirror of one's own strengths in Innovation Leadership and areas for strengthening one's skill, whatever the level of leadership one is in.

STAFFING : A screen for identifying candidates with the skills required for Innovation Leadership positions in R&D, Marketing, Sales, Business Development, or any other area calling for Innovation Leadership.

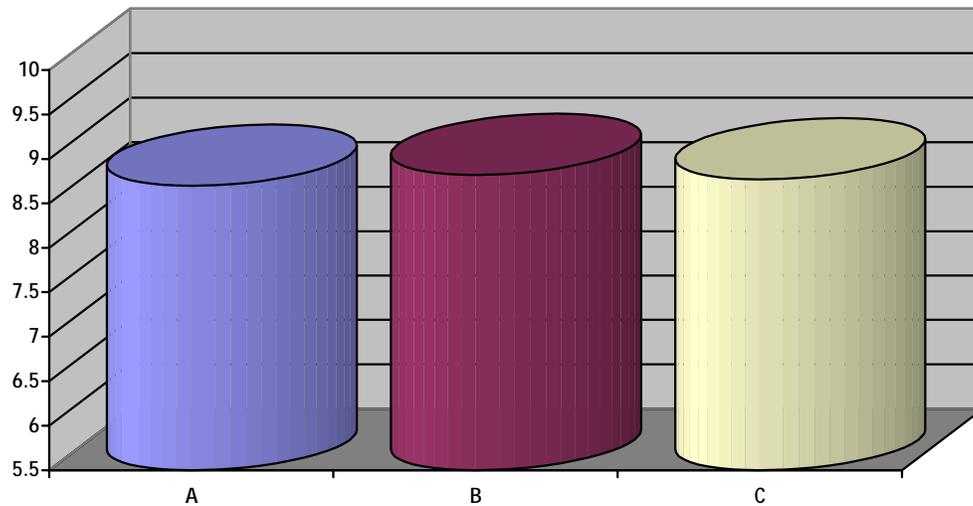

TEAM BUILDING : A means of identifying the particular strengths in a team responsible for moving an organization forward, to ensure that team members understand and complement one another's strengths.

Effective innovation and change leadership thrives on the synergy of three essential elements: creativity, leadership, and strategy. Creativity is the driving force behind exceptional products or services, pushing boundaries and fostering innovation. Leadership is the guiding hand that nurtures talent, motivates individuals, and transforms ideas into tangible outcomes. Strategy plays a pivotal role in providing direction, aligning efforts with organizational goals, and ensuring adaptability in a dynamic environment. Together, these three pillars form a cohesive framework that not only fuels innovation but also propels organizations towards enduring success, fostering a culture of continuous improvement and forward-thinking adaptation.

In the report that follows, you'll see your strengths and development areas in each of these dimensions. If you see primary or secondary strengths, know that these are areas you can depend on to keep you on track. You'll want to maximize these. If you see primary or secondary development, know that these are the result of your strengths getting in your way somehow. You'll want to moderate these.

Most of what you find here will probably not be new information for you. Perhaps, though, some of the items might come as a surprise. That is good. Keep open to them and think about them. You will probably begin to notice times when they actually manifest themselves in your life.

Exploring your potential for Innovation Leadership

(A) Creativity: The ability to be open to new options and ideas and to be willing to apply an inventive optimism to problems and challenges that move a group forward.

(B) Leadership: The ability to make decisions while promoting the freedom of others, motivating them to take risks and be accountable for achieving the common mission.

(C) Strategy: The ability to think into the future and decide proactively, setting challenging goals infused with a strong sense of purpose and priorities.

Coaching is available should you desire to discover more about what is behind each of these Innovation Leadership dimensions. **Other reports** are also available to enrich the knowledge you have of yourself. Ask the person who supplied this report to you for information on both the other reports and the coaching.

Innovation Leadership

CREATIVITY: The ability to generate options and see perspectives that result in new and out-of-the-ordinary concepts, products, and services.

Tends to overlook the perspective of others
- 4) **Respecting The Rights Of Each Person (Trust)**
Likely to overlook or discount the perspective of others
- 5) **Personal Commitment, Dedication (Vision, Mission)**
Does not always keep word and personal commitments

Innovation Leadership

For Your Development

First, reflect on your results.

Did any surprise you? Why?

Are there any items that show a level of development that you wish to strengthen?

What are some possible ways you go about doing that?

Second, select some action steps and build a concrete plan.

Which steps make the most sense to take?

What will I gain by taking those steps?

What or who could slow me down in the achievement of those gains?

How will I overcome those obstacles?

Innovation Leadership

For Your Development (continued)

Third, develop support that will enable you to sustain the growth.

Who might be a resource for me as I move forward?

When and how will I take the first step?

When and how will I monitor my progress?

When and how will I celebrate my success?
